

With eSMARTassets, identify, utilise and maintain your hospital assets more effectively.

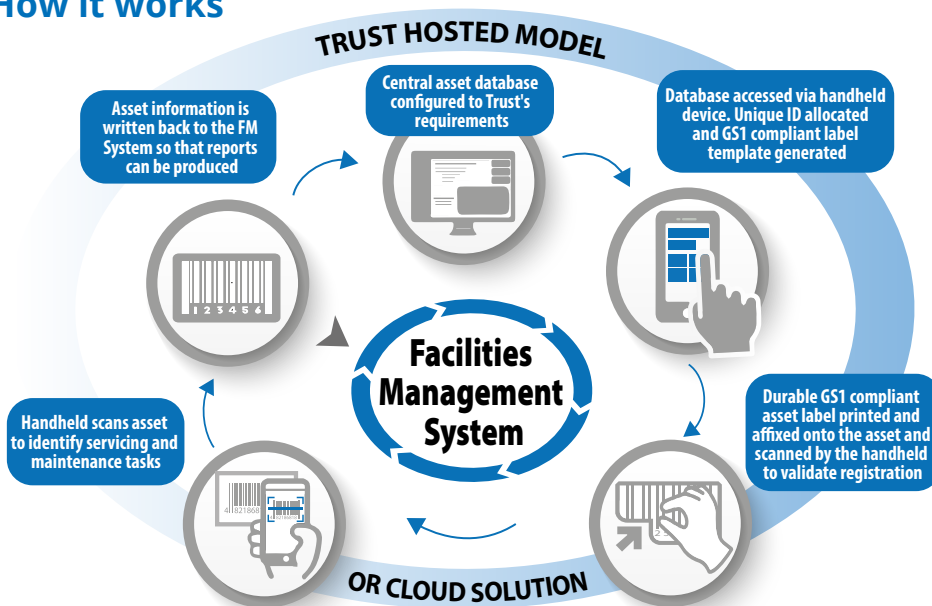

Increasingly, the NHS is working to greater financial constraints. Facilities & Estates and Clinical Engineering Departments are working to greater financial accountability of their asset register.

The Management of NHS furniture, IT equipment and all types of hospital assets and consumables can be an onerous and time consuming task. Medical equipment is often borrowed from one department to another. Asset Labels are the most effective way to guarantee that your hospital assets can be accurately identified, stored in the locations they should be, regularly serviced and accurately maintained.

- eSMARTassets allows Facilities & Estates staff to print and affix tags onto assets and, at the same time, capture information on the asset before porting this data into the Trust's FM System.
- eSMARTassets can be provided as a complete solution including handhelds, printers, printer labels and ribbons, software and support services.

How it works

Key benefits

- **Better utilisation of medical equipment and assets** through real-time identification
- **Time savings:** reduction in clinical time spent searching for the assets. The use of barcodes to update the asset register reduces manual processes
- **Capital costs savings** and lower operational costs
- **Drive towards GS1 Standards adoption**
- **Improved processes:** equipment repair and maintenance schedule are accurately tracked
- **Improved patient safety** through more efficient maintenance of your equipment

Key features

-  Compatible with Android Devices from all major manufacturers
-  Servicing and maintenance tasks updates
-  Output to all Zebra barcode printers
-  GS1 Compliant Solution – assets can be linked to GLNs to allow reporting on locations
-  Fully customisable
-  Generate and exports customisable reports in various formats
